Important Notice:

- The Q panel is only compatible with Philips Hue devices that have not been registered before in any HUB (Phillips HUB included) and it's also not compatible with Phillips HUB or Philips Hue kits.
- The Automation setting will differ between white and color Philips hue

Easy installation :

1. Login at the home portal server.
2. Now go to settings and enter your preset Master Code.
3. Press on (+) to add a new device.

4. Connect you Philips Hue to the AC and turn it ON.

5. The Q panel will detect the Philips Hue and it will be displayed on your screen. Click on the devices and press ok.

6. Go to the automation menu to manage your Philips Hue. (The Color options will be only displayed for Philips Hue with color capability)
